

## Maths Assessment Year 5: Fractions

- 1. Compare and order fractions whose denominators are all multiples of the same number.
- 2. Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.
- 3. Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example,  $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$ ].
- 4. Add and subtract fractions with the same denominator, and denominators that are multiples of the same number.
- 5. Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.
- 6. Read and write decimal numbers as fractions [for example,  $0.71 = \frac{71}{100}$  ].
- 7. Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.
- 8. Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place.
- 9. Read, write, order and compare numbers with up to 3 decimal places.
- 10. Solve problems involving number up to 3 decimal places.
- 11. Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per 100', and write percentages as a fraction with denominator 100, and as a decimal fraction.
- 12. Solve problems which require knowing percentage and decimal equivalents of  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{5}$ ,  $\frac{2}{5}$ ,  $\frac{4}{5}$  and those fractions with a denominator of a multiple of 10 or 25.

## Maths Assessment Year 5: Fractions

1. Compare and order fractions whose denominators are all multiples of the same number.

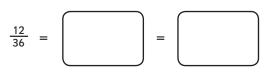

a) Use the symbols < or > to compare these fractions:

	< or >	
<u>3</u> 4		<u>5</u> 8
4		<u>1</u> 3
<u>2</u> 5		<u>7</u> 15

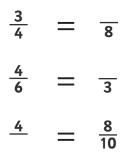

#### **b)** Order these fractions from smallest to largest:

- **2.** Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.
- **a)** Here is a square.  $\frac{12}{36}$  of the square has been shaded. Use the diagram to help you write two equivalent fractions of  $\frac{12}{36}$ .

b) Complete these equivalent pairs:

**3.** Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example,  $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$ ].

2 marks

a) Convert these improper fractions into mixed numbers:

improper fraction	mixed number
<u>5</u> 2	
<u>6</u> 4	
<u>10</u> 3	
<u>15</u> 6	

b) Convert these mixed numbers into improper fractions:

mixed number	improper fraction
$5 \frac{1}{2}$	
$3\frac{2}{3}$	
$3\frac{3}{4}$	
$1\frac{7}{8}$	

c) Add these fractions and write the answer as a mixed number:

**4.** Add and subtract fractions with the same denominator, and denominators that are multiples of the same number.

$$\frac{5}{9} + \frac{2}{9} = \boxed{}$$

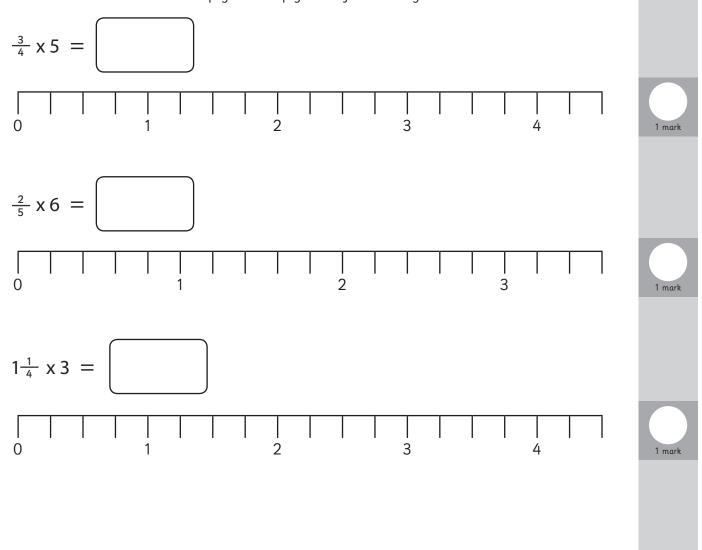

$$\frac{1}{4} + \frac{3}{8} =$$

and diagrams.

Use these number lines to help you multiply these fractions by a whole number:

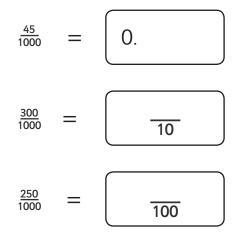

6. Read and write decimal numbers as fractions.

Complete this table, writing decimals as fractions and fractions as decimals:

decimals	fractions
0.34	
	<u>3</u> 10
0.09	
	<u>17</u> 100

**7.** Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.

### Complete the missing boxes:

8. Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place.

#### a) Round these numbers to the nearest whole number:

16.47	
182.75	
20.06	
197.99	
1200.66

b)	Round	These	numbers	to	1	decimal	place:	
----	-------	-------	---------	----	---	---------	--------	--

17.58	
124.63	
501.33	
1790.69	
2432.45	

9. Read, write, order and compare numbers with up to 3 decimal places.

# a) Use the symbols < or > to compare these decimals:

	< or >	
12.54		12.56
101.23		101.206
1987.52		1987.561
16341.06		16341.1

### **b)** order these numbers from largest to smallest;

12.045 11.70 12.7 11.071	12.643	11.78	12.7	11.871
--------------------------	--------	-------	------	--------

Iargest 10.Solve problems involving number up to 3 decimal places. 1 mile = 1.609km a) Jamil enjoys cycling. He rides 10 miles on Monday. What is that in km? Show yo working out.
